

# ACCEPTANCE DELIVERY

Please note the following points for accepting a delivery:

- All the engines we ship are either wrapped in **black foil** and with a parcel tape machine fixed on the pallet at least 2 times OR are delivered in a wooden box.
- On each of the black foliated broadcasts sticks a **orange** sticker with the inscription: "**Please check delivery immediately!**"
- All our shipments are sent with transport insurance!  
Therefore, it is essential to check the integrity of the black foil or the wooden box when taking over. Then remove the foil or open the box and examine the engine for transport damage!
- The **transport insurance** only takes over damages that were recorded **immediately upon takeover** with the driver of the forwarding company.
- If damage has been detected, it must be noted on the driver's glow and a **copy** of it must be made. Please do not trust the driver to pass on this note!
- Photograph the places where damage can be seen!!!
- Even if the driver urges that he does not have time to do so – Do not sign before the goods have not been checked, or any damage detected and a copy of the delivery note has been made! Write down the driver's name and license plate!
- Determined damage then immediately with the copy of the delivery note and the photos report to us in order to ensure a quick processing with the insurance company!

**ATTENTION: We do not accept any liability for transport damage that was not detected and noted during the takeover!**
